U-2 Incident.

TO THE CHRISTIAN SCIENCE MONITOR:

It is very disheartening to read letters condemning our government for the U-2 incident. I feel that those who condemn the use of U-2's and all other provisions for self-defense, such as atom bomb tests, do not appreciate the great heritage of being an American. If the same individuals had an opportunity to use the U-2's for their own advantage I doubt very much that they would hesitate to do so.

Do those who condemn the use of U-2's also think it is right for Moscow to hide microphones in the American Embassy in Moscow as has been revealed by our State Department? I am tired of reading letters by self-righteous people who wish to appease Russian aggression.
